Getting started quickly

Configuring your app

To connect services and DevOps toolchains...

1. Use the **Services** card to connect a service to your app. Select an existing service instance or create a new one. [Learn more](#).

2. If you want to view the code before you deploy, click **Download code** to obtain a .zip file.

3. Click **Deploy your app** in the **Deployment Automation** card to select the deployment target and configure the Continuous Deployment service. The deployment begins automatically.

4. After the deployment begins, you can view the status of the deployment, modify your app, view your repo, or view the app's URL.

5. If you make any changes to your app, build, or deployment target, click **Deploy** to deploy it again.

Building, running, and deploying your app

To build and run your app locally:

1. Run the `ibmcloud dev code <APPNAME>` command to start the local development environment.
