| Project Name Project - Real time River water quality monitoring and control system |  |  |  |  |
| Maximum Marks 4 Marks  |  |  |  |  |

## **Data Flow Diagram:**

## **User Stories**

| User Type                 | Functional<br>Requirement<br>(Epic) | User User Story / Task Story Number  | Acceptance criteria                                    | Priority | Release  |
|---------------------------|-------------------------------------|--|--|----------|----------|
| Customer<br>(Mobile user) | Registration                        | USN-1 As a user, I can register for the application by entering email, password, and confirming my password. | I can access my account/dashboard                      | High     | Sprint-1 |
|                           |                                     | USN-2 As a user, I will receive a confirmation email once I have registered for the application              | I can receive<br>confirmation email &<br>click confirm | High     | Sprint-2 |
|                           |                                     | USN-3 As a user, I can register for the application through Google   | I can register & access the dashboard with Google      | High     | Sprint-1 |
|                           |                                     | USN-4 As a user, I can register for the application through Gmail  | I can register through the mail.                       | Medium   | Sprint-2 |
|                           | Login                               | USN-5 As a user, I can log into the application by entering email, password & captcha                        | I can receive login credentials.                       | High     | Sprint-1 |
|                           | Interface                           | USN-6 As a user, the interface should be user-friendly manner  | I can able to access easily.                           | Medium   | Sprint-1 |
| Customer<br>(Web user)    | dashboard                           | USN-7 As a user, I can access the specific info (ph. value, temp, humidity, quality).                        | I can able to know<br>the quality of the<br>water.     | High     | Sprint-1 |
| Customer (input)          |                                     | USN-8 As a user, I can view data in visual representation manner(graph)                                      | I can easily understand by visuals.                    | High     | Sprint-1 |
|                           | Taste                               | USN-9 As a user, I can able to view the quality(salty)   | I can easily know<br>whether                           | High     | Sprint-1 |

|               |                   | of the water   | it is salty or not                              |        |          |
|---------------|-------------------|--|---|--------|----------|
|               | Colour visibility | USN-10 As a user, I can ably predict the water colour  | I can easily know<br>the condition by<br>colour | High   | Sprint-1 |
| Administrator | Risk tolerant     | USN-11 An administrator who Is handling the system should update and take care of the application. | Admin should monitor the records properly.      | Medium | Sprint-2 |
